REFERENCE NOTES

Additional information regarding the climate of Texas may be obtained by writing to the State Climatologist at Weather Bureau Airport Station, 1710 Wilshire Blvd. Austin 2, Texas, or to any Weather Bureau Office near you.

Figures and letters following the station name, such as 12 SSW, indicate distance in miles and direction from the post office.

Delayed data and corrections will be carried only in the June and December issues of this bulletin.

Monthly and seasonal snowfall and heating degree days for the preceding 12 months will be carried in the June issue of this bulletin.

Stations appearing in the Index, but for which data are not listed in the tables, are either missing or received too late to be included in this issue.

Divisions, as used in "Climatological Data" Table and on the maps, became effective with data for October 1956.

Unless otherwise indicated, dimensional units used in this bulletin are: Temperature in °F, precipitation and evaporation in inches, and wind movement in miles. Monthly degree day totals are the sums of the negative departures of average daily temperatures from 65°F.

Evaporation is measured in the standard Weather Bureau type pan of 4 foot diameter unless otherwise shown by footnote following the "Evaporation and Wind" Table.

Long-term means for full-time stations (those shown in the Station Index as "U. S. Weather Bureau") are based on the period 1921-1950, adjusted to represent observations taken at the present location. Long-term means for all stations except full-time Weather Bureau stations are based on the period 1931-1955.

Water equivalent values published in the "Snowfall and Snow on Ground" Table are the water equivalent of snow, sleet, or ice on the ground. Samples for obtaining measurements are taken from different points for successive observations; consequently, occasional drifting and other causes of local variability in the snowpack may result in apparent inconsistencies in the record.

Entries of snowfall in the "Climatological Data" Table and the "Snowfall and Snow on Ground" Table, and in the seasonal snowfall table include snow and sleet. Entries of snow on ground include snow, sleet and ice.

Data in the "Daily Precipitation" Table; "Daily Temperature" Table; and "Evaporation and Wind" Table, and snowfall in the "Snowfall and Snow on Ground" Table, when published, are for the 24 hours ending at time of observation. The Station Index shows observation times in local standard time. During the summer months some observers take the observations on daylight saving time.

Snow on ground in the "Snowfall and Snow on Ground" Table is at observation time for all except Weather Bureau and FAA Stations. For those stations snow on ground values are at 0600 C.S.T.

In the Station Index the letters C, H, and J in the "Special" column under the heading "Observation Time and Tables", indicate the following:

C	Weighing Rain Gage Recording Station. Hourly precipitation values are processed for special purposes and are published later in "Hourly Precipitation Data" Bulletin.
H	"Snowfall and Snow on Ground" Table. Omission of data in any month indicates no snowfall and/or snow on ground in that month.
J	"Supplemental Data" Table.

Other Reference Notes

	No record in the "Climatological Data" Table and the "Daily Temperature" Table is indicated by no entry. Interpolated values for monthly precipitation totals may be found in the annual issue of this publication.
-	No record in the "Daily Precipitation" Table; "Evaporation and Wind" Table; "Snowfall and Snow on Ground" Table; and the Station Index.
+	And also on an earlier date or dates.
*	Amount included in following measurement, time distribution unknown.
#	Thermometers are generally exposed in a shelter located a few feet above sod-covered ground; however, the reference indicates that the thermometers are exposed in a shelter located on the roof of a building.
//	Gage is equipped with a windshield.
AR	This entry in time of observation column in Station Index means after rain.
AM	Data based on observational day ending before noon.
B	Adjusted to a full month.
D	Water equivalent of snowfall wholly or partly estimated, using a ratio of 1 inch water equivalent to every 10 inches of new snowfall.
M	One or more days of record missing; if average value is entered, less than 10 days record is missing. See "Daily Temperature" Table for detailed daily record. Degree day data, if carried for this station, have been adjusted to represent the value for a full month.
R	Amounts from recording gage. (These amounts are essentially accurate but may vary slightly from the amounts to be published later in Hourly Precipitation Data.)
SS	This entry in time of observation column in Station Index means observation made near sunset.
T	Trace, an amount too small to measure.
V	Includes total for previous month.

Subscription Price 20 cents per copy, monthly and annual; $2.50 per year. (Yearly subscription includes the Annual Summary.) Checks and money orders should be made payable to the Superintendent of Documents. Remittance and correspondence regarding subscriptions should be sent to the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

General weather conditions in the U. S. for each month are described in the publications MONTHLY WEATHER REVIEW, MONTHLY CLIMATOLOGICAL DATA-NATIONAL SUMMARY, and STORM DATA, all of which may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C.

Information concerning the history of changes in locations, elevations, exposure, etc., of substations through 1955 may be found in the publication "Substation History" for this state. That publication may be obtained from the Superintendent of Documents, Government Printing Office, Washington 25, D. C. for $1.00. Similar information for regular Weather Bureau stations may be found in the latest issues of Local Climatological Data Annual, obtained as indicated above, pric 15 cents.

CLIMATOLOGICAL DATA

TEXAS

AUGUST 1960
Volume 65 No. 8

DEC 17

ASHEVILLE: 1960

MONTHLY EXTREMES

Highest Temperature: 110° on the 3d at Presidio

Lowest Temperature: 48° on the 12th at Mount Locke

Greatest Total Precipitation: 15.05 inches at Port Arthur

Least Total Precipitation: 0.00 at Garden City 1 E

Greatest one-day Precipitation: 6.90 inches on the 14th at Port Arthur WB AP

Much of the data presented in this publication comes from observations taken by volunteer cooperative observers. These observations are mailed after the close of the month to a Weather Records Processing Center, where they are placed on punch cards and checked for accuracy and completeness. These cards are used to prepare copy for the various tables. Printing and mailing is done at the National Weather Records Center at Asheville, North Carolina.

The various steps all take time. Records for any state cannot be checked by machine until nearly all of them for that state have been received. Printing cannot be done until all the tables for an issue are completed and assembled.

Constant effort is made to speed up publication and still maintain high quality of the data. A realistic deadline for mailing the printed Climatological Data has been set as the 15th of the second following month (45 days after the end of the month for which data are published). If any recipient's copy is unduly delayed, the Director, National Weather Records Center, Asheville, North Carolina should be advised.

MAX AND MIN IN DAILY EVAPORATION TABLE REFER TO EXTREMES OF TEMPERATURE OF WATER IN PAN AS RECORDED DURING THE 24 HOURS ENDING AT TIME OF OBSERVATION.
(A) EVAPORATION MEASURED IN A SUNKEN SCREENED PAN OF 24-INCH DIAMETER.
(B) EVAPORATION MEASURED IN A SUNKEN PAN OF 72-INCH DIAMETER.
(F) ALUMINUM (ONE-FOURTH INCH THICK) EVAPORATION PAN.

See reference notes following Station Index.

REFERENCE NOTES

Additional information regarding the climate of Texas may be obtained by writing to the State Climatologist at Weather Bureau Airport Station, 1710 Wilshire Blvd. Austin 2, Texas, or to any Weather Bureau Office near you.

Figures and letters following the station name, such as 12 SSW, indicate distance in miles and direction from the post office.

Delayed data and corrections will be carried only in the June and December issues of this bulletin.

Monthly and seasonal snowfall and heating degree days for the preceding 12 months will be carried in the June issue of this bulletin.

Stations appearing in the Index, but for which data are not listed in the tables, are either missing or received too late to be included in this issue.

Divisions, as used in "Climatological Data" Table and on the maps, became effective with data for October 1956.

Unless otherwise indicated, dimensional units used in this bulletin are: Temperature in °F, precipitation and evaporation in inches, and wind movement in miles. Monthly degree day totals are the sums of the negative departures of average daily temperatures from 65°F.

Evaporation is measured in the standard Weather Bureau type pan of 4 foot diameter unless otherwise shown by footnote following the "Evaporation and Wind" Table.

Long-term means for full-time stations (those shown in the Station Index as "U. S. Weather Bureau") are based on the period 1921-1950, adjusted to represent observations taken at the present location. Long-term means for all stations except full-time Weather Bureau stations are based on the period 1931-1955.

Water equivalent values published in the "Snowfall and Snow on Ground" Table are the water equivalent of snow, sleet, or ice on the ground. Samples for obtaining measurements are taken from different points for successive observations; consequently, occasional drifting and other causes of local variability in the snowpack may result in apparent inconsistencies in the record.

Entries of snowfall in the "Climatological Data" Table and the "Snowfall and Snow on Ground" Table, and in the seasonal snowfall table include snow and sleet. Entries of snow on ground include snow, sleet and ice.

Data in the "Daily Precipitation" Table; "Daily Temperature" Table; and "Evaporation and Wind" Table, and snowfall in the "Snowfall and Snow on Ground" Table when published, are for the 24 hours ending at time of observation. The Station Index shows observation times in local standard time. During the summer months some observers take the observations on daylight saving time.

Snow on ground in the "Snowfall and Snow on Ground" Table is at observation time for all except Weather Bureau and FAA Stations. For those stations snow on ground values are at 0600 C.S.T.

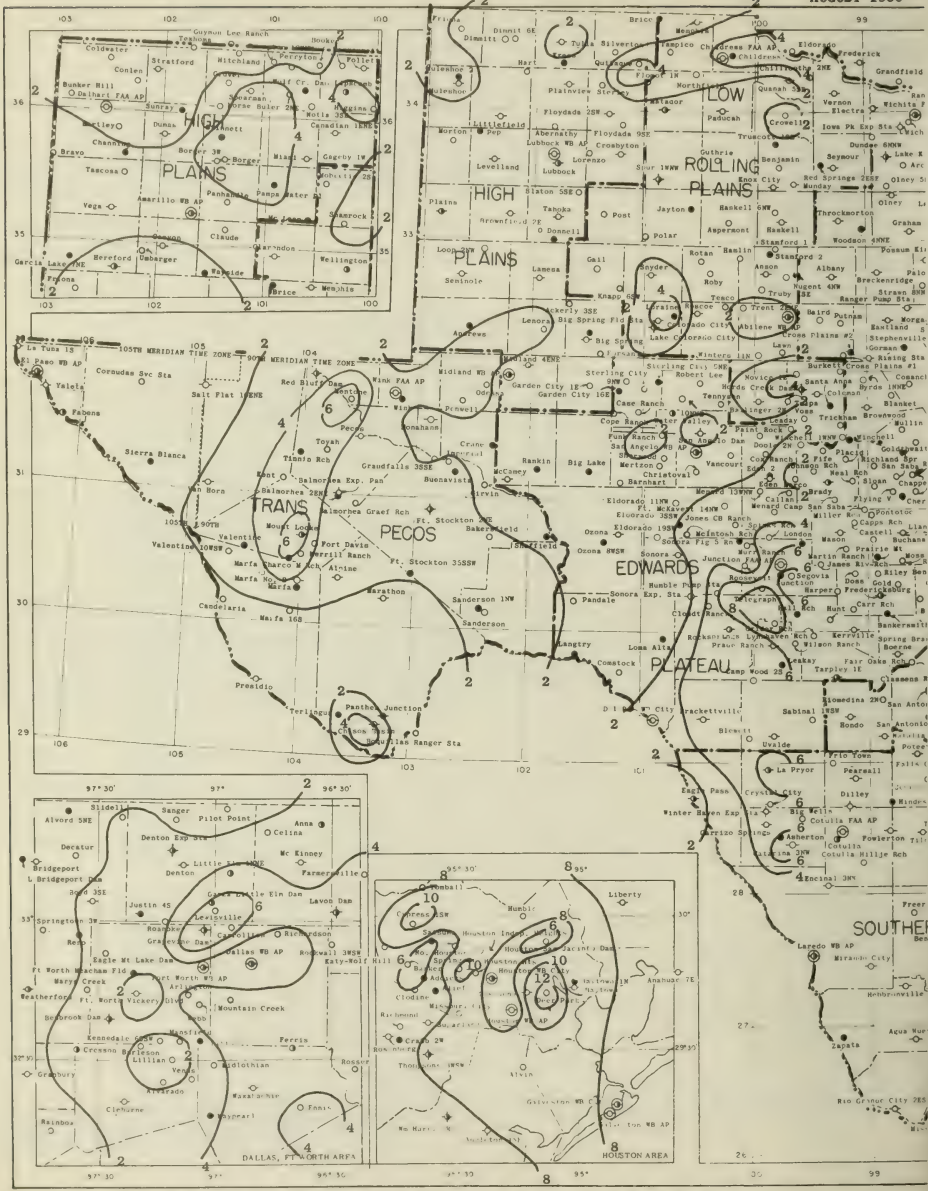
In the Station Index the letters C, H, and J in the "Special" column under the heading "Observation Time and Tables", indicate the following:

C	Weighing Rain Gage Recording Station. Hourly precipitation values are processed for special purposes and are published later in "Hourly Precipitation Data" Bulletin.
H	"Snowfall and Snow on Ground" Table. Omission of data in any month indicates no snowfall and/or snow on ground in that month.
J	"Supplemental Data" Table.

Other Reference Notes

	No record in the "Climatological Data" Table and the "Daily Temperature" Table is indicated by no entry.
	Interpolated values for monthly precipitation totals may be found in the annual issue of this publication.
-	No record in the "Daily Precipitation" Table; "Evaporation and Wind" Table; "Snowfall and Snow on Ground" Table; and the Station Index.
+	And also on an earlier date or dates.
*	Amount included in following measurement, time distribution unknown.
#	Thermometers are generally exposed in a shelter located a few feet above sod-covered ground; however, the reference indicates that the thermometers are exposed in a shelter located on the roof of a building.
//	Gage is equipped with a windshield.
AR	This entry in time of observation column in Station Index means after rain.
AM	Data based on observational day ending before noon.
B	Adjusted to a full month.
D	Water equivalent of snowfall wholly or partly estimated, using a ratio of 1 inch water equivalent to every 10 inches of new snowfall.
M	One or more days of record missing; if average value is entered, less than 10 days record is missing. See "Daily Temperature" Table for detailed daily record. Degree day data, if carried for this station, have been adjusted to represent the value for a full month.
R	Amounts from recording gage. (These amounts are essentially accurate but may vary slightly from the amounts to be published later in Hourly Precipitation Data.)
SS	This entry in time of observation column in Station Index means observation made near sunset.
T	Trace, an amount too small to measure.
V	Includes total for previous month.

Subscription Price 20 cents per copy, monthly and annual; $2.50 per year. (Yearly subscription includes the Annual Summary.) Checks and money orders should be made payable to the Superintendent of Documents. Remittance and correspondence regarding subscriptions should be sent to the Superintendent of Documents, Government Printing Office, Washington 25, D. C.



General weather conditions in the U. S. for each month are described in the publications MONTHLY WEATHER REVIEW, MONTHLY CLIMATOLOGICAL DATA-NATIONAL SUMMARY, and STORM DATA, all of which may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C.

Information concerning the history of changes in locations, elevations, exposure, etc., of substations through 1955 may be found in the publication "Substation History" for this state. That publication may be obtained from the Superintendent of Documents, Government Printing Office, Washington 25, D. C. for $1.00. Similar information for regular Weather Bureau stations may be found in the latest issues of Local Climatological Data Annual, obtained as indicated above, price 15 cents.

MAX AND MIN IN DAILY EVAPORATION TABLE REFER TO EXTREMES OF TEMPERATURE OF WATER IN PAN AS RECORDED DURING THE 24 HOURS ENDING AT TIME OF OBSERVATION.
(A) EVAPORATION MEASURED IN A SUNKEN SCREENED PAN OF 24-INCH DIAMETER.
(B) EVAPORATION MEASURED IN A SUNKEN PAN OF 72-INCH DIAMETER.
(F) ALUMINUM (ONE-FOURTH INCH THICK) EVAPORATION PAN.

See reference notes following Station Index.

TOTAL PRECIPITATION

SEPTEMBER 1960

ISOLINES ARE DRAWN THROUGH POINTS OF APPROXIMATELY EQUAL VALUES. HOURLY PRECIPITATION DATA FROM RECORDER SUBSTATIONS WILL BE AVAILABLE IN THE PUBLICATION "HOURLY PRECIPITATION DATA."

REFERENCE NOTES

Additional information regarding the climate of Texas may be obtained by writing to the State Climatologist at Weather Bureau Airport Station, 1710 Wilshire Blvd. Austin 2, Texas, or to any Weather Bureau Office near you.

Figures and letters following the station name, such as 12 SSW, indicate distance in miles and direction from the post office.

Delayed data and corrections will be carried only in the June and December issues of this bulletin.

Monthly and seasonal snowfall and heating degree days for the preceding 12 months will be carried in the June issue of this bulletin.

Stations appearing in the Index, but for which data are not listed in the tables, are either missing or received too late to be included in this issue.

Divisions, as used in "Climatological Data" Table and on the maps, became effective with data for October 1956.

Unless otherwise indicated, dimensional units used in this bulletin are: Temperature in °F, precipitation and evaporation in inches, and wind movement in miles. Monthly degree day totals are the sums of the negative departures of average daily temperatures from 65°F.

Evaporation is measured in the standard Weather Bureau type pan of 4 foot diameter unless otherwise shown by footnote following the "Evaporation and Wind" Table.

Long-term means for full-time stations (those shown in the Station Index as "U. S. Weather Bureau") are based on the period 1921-1950, adjusted to represent observations taken at the present location. Long-term means for all stations except full-time Weather Bureau stations are based on the period 1931-1955.

Water equivalent values published in the "Snowfall and Snow on Ground" Table are the water equivalent of snow, sleet, or ice on the ground. Samples for obtaining measurements are taken from different points for successive observations; consequently, occasional drifting and other causes of local variability in the snowpack may result in apparent inconsistencies in the record.

Entries of snowfall in the "Climatological Data" Table and the "Snowfall and Snow on Ground" Table, and in the seasonal snowfall table include snow and sleet. Entries of snow on ground include snow, sleet and ice.

Data in the "Daily Precipitation" Table; "Daily Temperature" Table; and "Evaporation and Wind" Table, and snowfall in the "Snowfall and Snow on Ground" Table, when published, are for the 24 hours ending at time of observation. The Station Index shows observation times in local standard time. During the summer months some observers take the observations on daylight saving time.

Snow on ground in the "Snowfall and Snow on Ground" Table is at observation time for all except Weather Bureau and FAA Stations. For those stations snow on ground values are at 0600 C.S.T.

In the Station Index the letters C, H, and J in the "Special" column under the heading "Observation Time and Tables", indicate the following:

C	Weighing Rain Gage Recording Station. Hourly precipitation values are processed for special purposes and are published later in "Hourly Precipitation Data" Bulletin.
H	"Snowfall and Snow on Ground" Table. Omission of data in any month indicates no snowfall and/or snow on ground in that month.
J	"Supplemental Data" Table.

Other Reference Notes

	No record in the "Climatological Data" Table and the "Daily Temperature" Table is indicated by no entry.
	Interpolated values for monthly precipitation totals may be found in the annual issue of this publication.
-	No record in the "Daily Precipitation" Table; "Evaporation and Wind" Table; "Snowfall and Snow on Ground" Table; and the Station Index.
-	And also on an earlier date or dates.
*	Amount included in following measurement, time distribution unknown.
#	Thermometers are generally exposed in a shelter located a few feet above sod-covered ground; however, the reference indicates that the thermometers are exposed in a shelter located on the roof of a building.
'	Gage is equipped with a windshield.
AM	This entry in time of observation column in Station Index means after rain.
B	Adjusted to a full month.
D	Water equivalent of snowfall wholly or partly estimated, using a ratio of 1 inch water equivalent to every 10 inches of new snowfall.
M	One or more days of record missing; if average value is entered, less than 10 days record is missing. See "Daily Temperature" Table for detailed daily record. Degree day data, if carried for this station, have been adjusted to represent the value for a full month.
P	Amounts from recording gage. (These amounts are essentially accurate but may vary slightly from the amounts to be published later in Hourly Precipitation Data.)
SS	This entry in time of observation column in Station Index means observation made near sunset.
T	Trace, an amount too small to measure.
V	Includes total for previous month.

Subscription Price: 20 cents per copy, monthly and annual; $2.50 per year. (Yearly subscription includes the Annual Summary.) Checks and money orders should be made payable to the Superintendent of Documents. Remittance and correspondence regarding subscriptions should be sent to the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

General weather conditions in the U. S. for each month are described in the publications MONTHLY WEATHER REVIEW, MONTHLY CLIMATOLOGICAL DATA-NATIONAL SUMMARY, and STORM DATA, all of which may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C.

Information concerning the history of changes in locations, elevations, exposure, etc., of substations through 1955 may be found in the publication "Substation History" for this state. That publication may be obtained from the Superintendent of Documents, Government Printing Office, Washington 25, D. C. for $1.00. Similar information for regular Weather Bureau stations may be found in the latest issues of Local Climatological Data Annual, obtained as indicated above, price 25 cents.

ASHEVILLE: 1960

TEXAS - OCTOBER 1960

WEATHER SUMMARY

October weather was warm, wet, and stormy. The dry weather of the previous month was dramatically reversed as all sections except southwest Texas reported rainfall much above average. Amounts were generally 200-300% of normal in the panhandle, southern plains, portions of north Texas, and the upper coast, with amounts 400-600% of normal in portions of south central Texas. Victoria recorded 17.25 inches, an all time record for any month. It was the wettest October of record at Corpus Christi, with 15.49 inches downtown and 10.66 at the airport station. Austin also reported the wettest October on record with 12.31 inches. Lubbock reported the greatest October rainfall in 20 years, with 5.83 inches.

From the 16th to the 30th, torrential rains were common in south central Texas with flash floods and major rises on the Navidad, Lavaca, Guadalupe, San Antonio, Nueces, Colorado, and Brazos River basins. Thirteen persons died of drowning during flash floods, with damage to property in excess of 6 million dollars. According to flood reports prepared by the American Red Cross, at least 1394 buildings were damaged, affecting 1275 families.

Damaging hailstorms were frequent in western and north central Texas with losses to crops estimated at 13.5 million dollars, and to property, 1.5 million dollars.

Eleven tornadoes, occurring on five separate days, injured twenty persons, but there were no deaths reported. Property damage was estimated at 869 thousand dollars.

Property damage from weather was estimated at 8.6 million for the State, and damage to crops, at least 13.9 million dollars. However, above-normal rains left range and pasture feed conditions good to excellent in all areas, and were very beneficial to small grain crops on the high plains.

A supplemental precipitation data table for the storm of October 24-25 in the vicinity of Kenedy, Texas is published in this issue. The data were obtained in cooperation with the Work Unit Conservationist of the U. S. Soil Conservation Service, Kenedy, Texas.

For detailed information, the reader is referred to STORM DATA, and the WEEKLY WEATHER AND CROP BULLETINS, for October.

Robert B. Orton
Weather Bureau State Climatologist
1710 Wilshire Boulevard
Austin 2, Texas

MONTHLY EXTREMES

Highest Temperature: 100° on the 6th at Three Stations

Lowest Temperature: 24° on the 31st at Stratford

Greatest Total Precipitation: 19.01 inches at Refugio

Least Total Precipitation: 0.00 at Presidio

Greatest one-day Precipitation: 13.38 inches on the 16th at Refugio

Greatest Total Snowfall: 1.0 inch at Hitchland

Deepest Snow on Ground: 1 inch on the 29th at Perryton

REFERENCE NOTES

Additional information regarding the climate of Texas may be obtained by writing to the State Climatologist at Weather Bureau Airport Station, 1710 Wilshire Blvd, Austin 2, Texas, or to any Weather Bureau Office near you.

Figures and letters following the station name, such as 12 SSW, indicate distance in miles and direction from the post office.

Delayed data and corrections will be carried only in the June and December issues of this bulletin.

Monthly and seasonal snowfall and heating degree days for the preceding 12 months will be carried in the June issue of this bulletin.

Stations appearing in the Index, but for which data are not listed in the tables, are either missing or received too late to be included in this issue.

Divisions, as used in "Climatological Data" Table and on the maps, became effective with data for October 1956.

Unless otherwise indicated, dimensional units used in this bulletin are: Temperature in °F, precipitation and evaporation in inches, and wind movement in miles. Monthly degree day totals are the sums of the negative departures of average daily temperatures from 65°F.

Evaporation is measured in the standard Weather Bureau type pan of 4 foot diameter unless otherwise shown by footnote following the "Evaporation and Wind" Table.

Long-term means for full-time stations (those shown in the Station Index as "U. S. Weather Bureau") are based on the period 1921-1950, adjusted to represent observations taken at the present location. Long-term means for all stations except full-time Weather Bureau stations are based on the period 1931-1955.

Water equivalent values published in the "Snowfall and Snow on Ground" Table are the water equivalent of snow, sleet, or ice on the ground. Samples for obtaining measurements are taken from different points for successive observations; consequently, occasional drifting and other causes of local variability in the snowpack may result in apparent inconsistencies in the record.

Entries of snowfall in the "Climatological Data" Table and the "Snowfall and Snow on Ground" Table, and in the seasonal snowfall table include snow and sleet. Entries of snow on ground include snow, sleet and ice.

Data in the "Daily Precipitation" Table; "Daily Temperature" Table; and "Evaporation and Wind" Table, and snowfall in the "Snowfall and Snow on Ground" Table, when published, are for the 24 hours ending at time of observation. The Station Index shows observation times in local standard time. During the summer months some observers take the observations on daylight saving time.

Snow on ground in the "Snowfall and Snow on Ground" Table is at observation time for all except Weather Bureau and FAA Stations. For those stations snow on ground values are at 0600 C.S.T.

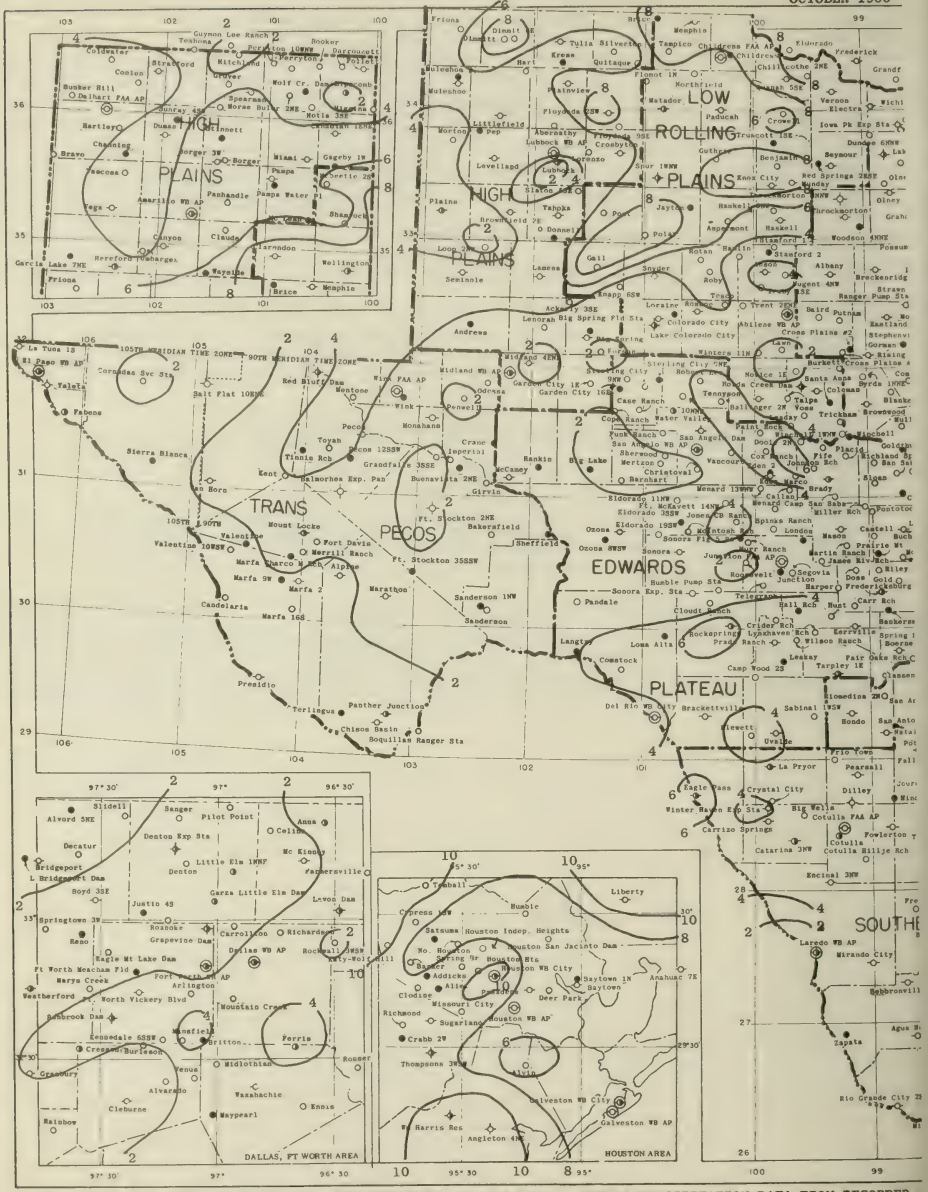
In the Station Index the letters C, H, and J in the "Special" column under the heading "Observation Time and Tables", indicate the following:

C	Weighing Rain Gage Recording Station. Hourly precipitation values are processed for special purposes and are published later in "Hourly Precipitation Data" Bulletin.
H	"Snowfall and Snow on Ground" Table. Omission of data in any month indicates no snowfall and/or snow on ground in that month.
J	"Supplemental Data" Table.

Other Reference Notes

	No record in the "Climatological Data" Table and the "Daily Temperature" Table is indicated by no entry.
	Interpolated values for monthly precipitation totals may be found in the annual issue of this publication.
-	No record in the "Daily Precipitation" Table; "Evaporation and Wind" Table; "Snowfall and Snow on Ground" Table; and the Station Index.
+	And also on an earlier date or dates.
*	Amount included in following measurement, time distribution unknown.
#	Thermometers are generally exposed in a shelter located a few feet above sod-covered ground; however, the reference indicates that the thermometers are exposed in a shelter located on the roof of a building.
//	Gage is equipped with a windshield.
AR	This entry in time of observation column in Station Index means after rain.
B	Adjusted to a full month.
D	Water equivalent of snowfall wholly or partly estimated, using a ratio of 1 inch water equivalent to every 10 inches of new snowfall.
M	One or more days of record missing; if average value is entered, less than 10 days record is missing. See "Daily Temperature" Table for detailed daily record. Degree day data, if carried for this station, have been adjusted to represent the value for a full month.
R	Amounts from recording gage. (These amounts are essentially accurate but may vary slightly from the amounts to be published later in Hourly Precipitation Data.)
SS	This entry in time of observation column in Station Index means observation made near sunset.
T	Trace, an amount too small to measure.
V	Includes total for previous month.

Subscription Price 20 cents per copy, monthly and annual; $2.50 per year. (Yearly subscription includes the Annual Summary.) Checks and money orders should be made payable to the Superintendent of Documents. Remittance and correspondence regarding subscriptions should be sent to the Superintendent of Documents, Government Printing Office, Washington 25, D. C.



General weather conditions in the U. S. for each month are described in the publications MONTHLY WEATHER REVIEW, MONTHLY CLIMATOLOGICAL DATA-NATIONAL SUMMARY, and STORM DATA, all of which may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C.

Information concerning the history of changes in locations, elevations, exposure, etc., of substations through 1955 may be found in the publication "Substation History" for this state. That publication may be obtained from the Superintendent of Documents, Government Printing Office, Washington 25, D. C. for $1.00. Similar information for regular Weather Bureau stations may be found in the latest issues of Local Climatological Data Annual, obtained as indicated above, pric 15 cents.

Ø DATA RECEIVED TOO LATE TO BE INCLUDED IN DIVISION MEANS.

MONTHLY EXTREMES

Highest Temperature: 95° on the 3d at Rio Grande City 2 ESE

Lowest Temperature: 13° on the 29th at Two Stations

Greatest Total Precipitation: 10.48 inches at Madisonville

Least Total Precipitation: 0.00 at Numerous Stations

Greatest one-day Precipitation: 4.55 inches on the 21st at Freeport 5 NW

Greatest Total Snowfall: Trace at Several Stations

Deepest Snow on Ground: Trace on the 28+ at Several Stations

See reference notes following Station Index.

MAX AND MIN IN DAILY EVAPORATION TABLE REFER TO EXTREMES OF TEMPERATURE OF WATER IN PAN AS RECORDED DURING THE 24 HOURS ENDING AT TIME OF OBSERVATION.
(A) EVAPORATION MEASURED IN A SUNKEN SCREENED PAN OF 24-INCH DIAMETER.
(B) EVAPORATION MEASURED IN A SUNKEN PAN OF 72-INCH DIAMETER.
(F) ALUMINUM (ONE-FOURTH INCH THICK) EVAPORATION PAN.

See reference notes following Station Index.

REFERENCE NOTES

Additional information regarding the climate of Texas may be obtained by writing to the State Climatologist at Weather Bureau Airport Station, 1710 Wilshire Blvd. Austin 2, Texas, or to any Weather Bureau Office near you.

Figures and letters following the station name, such as 12 SSW, indicate distance in miles and direction from the post office.

Delayed data and corrections will be carried only in the June and December issues of this bulletin.

Monthly and seasonal snowfall and heating degree days for the preceding 12 months will be carried in the June issue of this bulletin.

Stations appearing in the Index, but for which data are not listed in the tables, are either missing or received too late to be included in this issue.

Divisions, as used in "Climatological Data" Table and on the maps, became effective with data for October 1956.

Unless otherwise indicated, dimensional units used in this bulletin are: Temperature in °F, precipitation and evaporation in inches, and wind movement in miles. Monthly degree day totals are the sums of the negative departures of average daily temperatures from 65°F.

Evaporation is measured in the standard Weather Bureau type pan of 4 foot diameter unless otherwise shown by footnote following the "Evaporation and Wind" Table.

Long-term means for full-time stations (those shown in the Station Index as "U. S. Weather Bureau") are based on the period 1921-1950, adjusted to represent observations taken at the present location. Long-term means for all stations except full-time Weather Bureau stations are based on the period 1931-1955.

Water equivalent values published in the "Snowfall and Snow on Ground" Table are the water equivalent of snow, sleet, or ice on the ground. Samples for obtaining measurements are taken from different points for successive observations; consequently, occasional drifting and other causes of local variability in the snowpack may result in apparent inconsistencies in the record.

Entries of snowfall in the "Climatological Data" Table and the "Snowfall and Snow on Ground" Table, and in the seasonal snowfall table include snow and sleet. Entries of snow on ground include snow, sleet and ice.

Data in the "Daily Precipitation" Table; "Daily Temperature" Table; and "Evaporation and Wind" Table, and snowfall in the "Snowfall and Snow on Ground" Table, when published, are for the 24 hours ending at time of observation. The Station Index shows observation times in local standard time. During the summer months some observers take the observations on daylight saving time.

Snow on ground in the "Snowfall and Snow on Ground" Table is at observation time for all except Weather Bureau and FAA Stations. For those stations snow on ground values are at 0600 C.S.T.

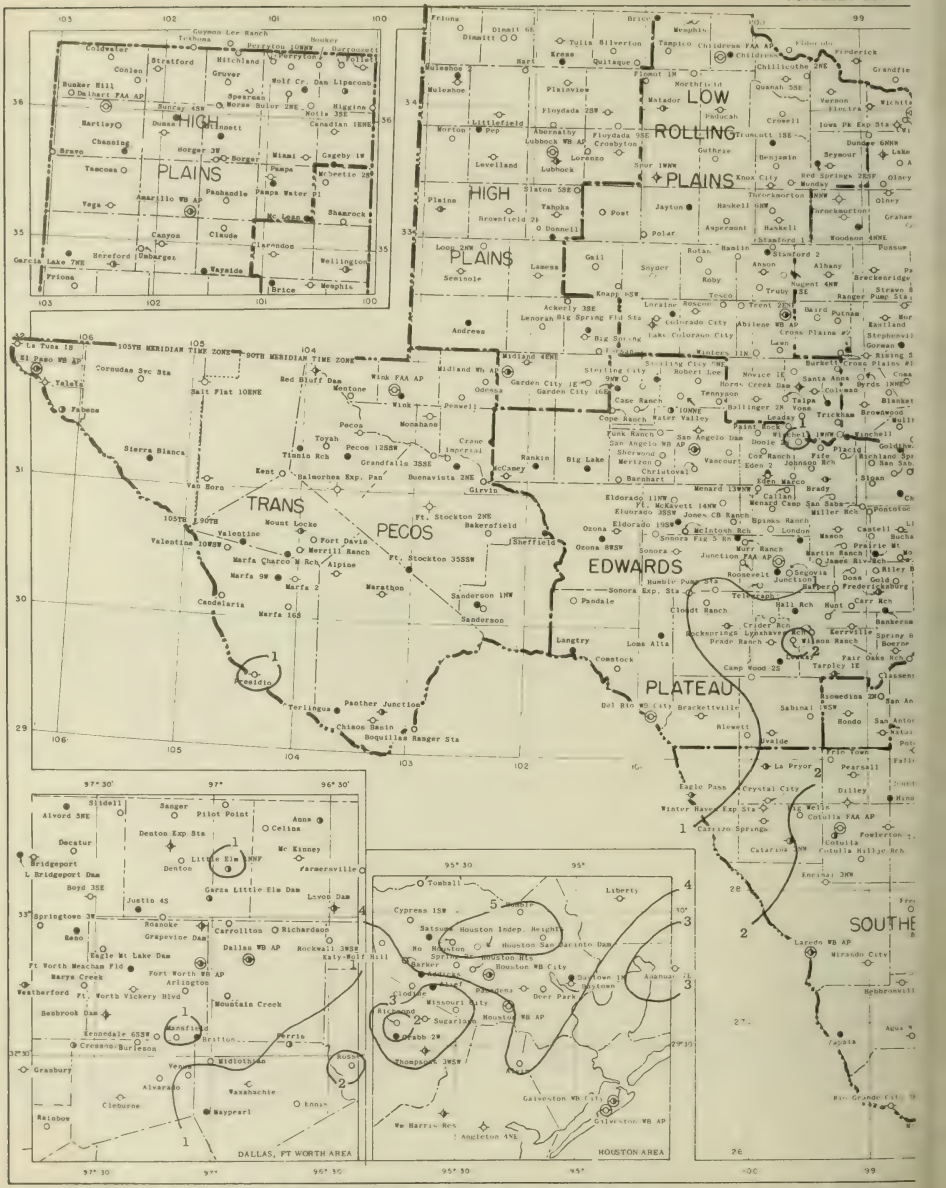
In the Station Index the letters C, H, and J in the "Special" column under the heading "Observation Time and Tables", indicate the following:

C	Weighing Rain Gage Recording Station. Hourly precipitation values are processed for special purposes and are published later in "Hourly Precipitation Data" Bulletin.
H	"Snowfall and Snow on Ground" Table. Omission of data in any month indicates no snowfall and/or snow on ground in that month.
J	"Supplemental Data" Table.

Other Reference Notes

	No record in the "Climatological Data" Table and the "Daily Temperature" Table is indicated by no entry.
	Interpolated values for monthly precipitation totals may be found in the annual issue of this publication.
-	No record in the "Daily Precipitation" Table; "Evaporation and Wind" Table; "Snowfall and Snow on Ground" Table; and the Station Index.
+	And also on an earlier date or dates.
*	Amount included in following measurement, time distribution unknown.
#	Thermometers are generally exposed in a shelter located a few feet above sod-covered ground; however, the reference indicates that the thermometers are exposed in a shelter located on the roof of a building.
/	Gage is equipped with a windshield.
AR	This entry in time of observation column in Station Index means after rain.
B	Adjusted to a full month.
E	Water equivalent of snowfall wholly or partly estimated, using a ratio of 1 inch water equivalent to every 10 inches of new snowfall.
M	One or more days of record missing; if average value is entered, less than 10 days record is missing. See "Daily Temperature" Table for detailed daily record. Degree day data, if carried for this station, have been adjusted to represent the value for a full month.
P	Amounts from recording gage. (These amounts are essentially accurate but may vary slightly from the amounts to be published later in Hourly Precipitation Data.)
SS	This entry in time of observation column in Station Index means observation made near sunset.
T	Trace, an amount too small to measure.
V	Includes total for previous month.

Subscription Price 20 cents per copy, monthly and annual; $2.50 per year. (Yearly subscription includes the Annual Summary.) Checks and money orders should be made payable to the Superintendent of Documents. Remittance and correspondence regarding subscriptions should be sent to the Superintendent of Documents, Government Printing Office, Washington 25, D. C.



General weather conditions in the U. S. for each month are described in the publications MONTHLY WEATHER REVIEW, MONTHLY CLIMATOLOGICAL DATA-NATIONAL SUMMARY, and STORM DATA, all of which may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C.

Information concerning the history of changes in locations, elevations, exposure, etc., of substations through 1955 may be found in the publication "Substation History" for this state. That publication may be obtained from the Superintendent of Documents, Government Printing Office, Washington 25, D. C. for $1.00. Similar information for regular Weather Bureau stations may be found in the latest issues of Local Climatological Data Annual, obtained as indicated above, price 15 cents.

TEXAS - DECEMBER 1960

WEATHER SUMMARY

December weather was cloudy and cold with alternating wet and dry periods. Moisture was general from the 5th to 15th and again from the 28th to 31st. Monthly precipitation exceeded normal in all sections except the Panhandle. Dallas received 8.50 inches, the wettest December on record. It was the 2d wettest December on record at Corpus Christi and the wettest December since 1947 at Fort Worth. Temperatures were below normal over the entire State. It was the 2d coldest December on record at Midland, the coldest December since 1917 at Abilene, and the coldest December since 1930 at Corpus Christi.

Heavy snow blanketed western Texas from the Trans-Pecos to the Panhandle from the 7th through the 10th with from 5 to 18 inches on the ground. A severe ice storm from about Sweetwater westward on the 7-9th caused extensive damage to power and communication lines. Midland measured 4.8 inches of snow for the month, the 3d heaviest December amount on record.

Rainfall totals of from 5 to 9 inches on the Cypress, Sabine, Little, and Sulphur River basins on December 5 through the 11th caused flooding along these streams. Heavy rains from the 4th through the 10th caused flooding in the Trinity River watershed from the 7th through the 17th. The lower Trinity basin, along with the Little River, the middle Brazos, and the San Jacinto, flooded as the result of 1- to 6-inch rains December 18 to the 23d. Heavy rains of 5 to 7 inches centered over Nueces and San Patricio Counties on the 28th and 29th, resulted in extensive flooding of streets, highways, and farmlands in these counties. In general, damage as a result of these floods was minor because of the dormant season, and confined mostly to fences, winter grazing for livestock, and some cattle losses in the river bottoms.

For detailed information, the reader is referred to STORM DATA, and the WEEKLY WEATHER AND CROP BULLETINS, for December.

Robert B. Orton
Weather Bureau State Climatologist
1710 Wilshire Boulevard
Austin 2, Texas

MONTHLY EXTREMES

Highest Temperature: 88° on the 6th at Kingsville

Lowest Temperature: 9° on the 9th at Dalhart FAA Airport

Greatest Total Precipitation: 13.43 inches at Hawkins 1 E

Least Total Precipitation: 0.47 inch at Hitchland

Greatest one-day Precipitation: 5.65 inches on the 7th at Gilmer

Greatest Total Snowfall: 17.0 inches at Memphis

Deepest Snow on Ground: 14 inches on the 11th at Wellington

MAX AND MIN IN DAILY EVAPORATION TABLE REFER TO EXTREMES OF TEMPERATURE OF WATER IN PAN AS RECORDED DURING THE 24 HOURS ENDING AT TIME OF OBSERVATION.
(A) EVAPORATION MEASURED IN A SUNKEN SCREENED PAN OF 24-INCH DIAMETER.
(B) EVAPORATION MEASURED IN A SUNKEN PAN OF 72-INCH DIAMETER.
(F) ALUMINUM (ONE-FOURTH INCH THICK) EVAPORATION PAN.

REFERENCE NOTES

Additional information regarding the climate of Texas may be obtained by writing to the State Climatologist at Weather Bureau Airport Station, 1710 Wilshire Blvd, Austin 2, Texas, or to any Weather Bureau Office near you.

Figures and letters following the station name, such as 12 SSW, indicate distance in miles and direction from the post office.

Delayed data and corrections will be carried only in the June and December issues of this bulletin.

Monthly and seasonal snowfall and heating degree days for the preceding 12 months will be carried in the June issue of this bulletin.

Stations appearing in the Index, but for which data are not listed in the tables, are either missing or received too late to be included in this issue.

Divisions, as used in "Climatological Data" Table and on the maps, became effective with data for October 1956.

Unless otherwise indicated, dimensional units used in this bulletin are: Temperature in °F, precipitation and evaporation in inches, and wind movement in miles. Monthly degree day totals are the sums of the negative departures of average daily temperatures from 65°F.

Evaporation is measured in the standard Weather Bureau type pan of 4 foot diameter unless otherwise shown by footnote following the "Evaporation and Wind" Table.

Long-term means for full-time stations (those shown in the Station Index as "U. S. Weather Bureau") are based on the period 1921-1950, adjusted to represent observations taken at the present location. Long-term means for all stations except full-time Weather Bureau stations are based on the period 1931-1955.

Water equivalent values published in the "Snowfall and Snow on Ground" Table are the water equivalent of snow, sleet, or ice on the ground. Samples for obtaining measurements are taken from different points for successive observations; consequently, occasional drifting and other causes of local variability in the snowpack may result in apparent inconsistencies in the record.

Entries of snowfall in the "Climatological Data" Table and the "Snowfall and Snow on Ground" Table, and in the seasonal snowfall table include snow and sleet. Entries of snow on ground include snow, sleet and ice.

Data in the "Daily Precipitation" Table; "Daily Temperature" Table; and "Evaporation and Wind" Table, and snowfall in the "Snowfall and Snow on Ground" Table, when published, are for the 24 hours ending at time of observation. The Station Index shows observation times in local standard time. During the summer months some observers take the observations on daylight saving time.

Snow on ground in the "Snowfall and Snow on Ground" Table is at observation time for all except Weather Bureau and FAA Stations. For those stations snow on ground values are at 0600 C.S.T.

In the Station Index the letters C, H, and J in the "Special" column under the heading "Observation Time and Tables", indicate the following:

C	Weighing Rain Gage Recording Station. Hourly precipitation values are processed for special purposes and are published later in "Hourly Precipitation Data" Bulletin.
H	"Snowfall and Snow on Ground" Table. Omission of data in any month indicates no snowfall and/or snow on ground in that month.
J	"Supplemental Data" Table.

Other Reference Notes

	No record in the "Climatological Data" Table and the "Daily Temperature" Table is indicated by no entry. Interpolated values for monthly precipitation totals may be found in the annual issue of this publication.
-	No record in the "Daily Precipitation" Table; "Evaporation and Wind" Table; "Snowfall and Snow on Ground" Table; and the Station Index.
+	And also on an earlier date or dates.
*	Amount included in following measurement, time distribution unknown.
#	Thermometers are generally exposed in a shelter located a few feet above sod-covered ground; however, the reference indicates that the thermometers are exposed in a shelter located on the roof of a building.
//	Gage is equipped with a windshield.
AR	This entry in time of observation column in Station Index means after rain.
B	Adjusted to a full month.
D	Water equivalent of snowfall wholly or partly estimated, using a ratio of 1 inch water equivalent to every 10 inches of new snowfall.
M	One or more days of record missing; if average value is entered, less than 10 days record is missing. See "Daily Temperature" Table for detailed daily record. Degree day data, if carried for this station, have been adjusted to represent the value for a full month.
R	Amounts from recording gage. (These amounts are essentially accurate but may vary slightly from the amounts to be published later in Hourly Precipitation Data.)
SS	This entry in time of observation column in Station Index means observation made near sunset.
T	Trace, an amount too small to measure.
V	Includes total for previous month.

Subscription Price 20 cents per copy, monthly and annual; $2.50 per year. (Yearly subscription includes the Annual Summary.) Checks and money orders should be made payable to the Superintendent of Documents. Remittance and correspondence regarding subscriptions should be sent to the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

General weather conditions in the U. S. for each month are described in the publications MONTHLY WEATHER REVIEW, MONTHLY CLIMATOLOGICAL DATA-NATIONAL SUMMARY, and STORM DATA, all of which may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C.

Information concerning the history of changes in locations, elevations, exposure, etc., of substations through 1955 may be found in the publication "Substation History" for this state. That publication may be obtained from the Superintendent of Documents, Government Printing Office, Washington 25, D. C. for $1.00. Similar information for regular Weather Bureau stations may be found in the latest issues of Local Climatological Data Annual, obtained as indicated above, price 15 cents.

USCOMM-WB-ASHEVILLE---2-6-61---1575

CORRECTIONS

JANUARY 1960:	LUBBOCK, Climatological Data Table, Temperature Departure should be -1.6 and Precipitation Departure .23. This data was originally published as Delayed Data on page 175 of the June 1960 bulletin.
MARCH 1960:	WILLER RANCH, Daily Precipitation Table, Amount on 27th should be 0, 28th 1.50, and Total 1.50.
	NIXON, Climatological Data Table, Precipitation Departure should be .38.
	SPEARMAN, Climatological Data Table, Precipitation Departure should be -.52.
APRIL 1960:	ELDORADO 19 SW, Daily Precipitation Table, Total Precipitation should be T.
AUGUST 1960:	HIGH PLAINS DIVISION, Climatological Data Table, Temperature Departure should be -0.7.

ø TOTAL PRECIPITATION SINCE PREVIOUS SOIL MOISTURE MEASUREMENT.
NOTE: NEGATIVE AVAILABLE MOISTURE INDICATES AMOUNT BELOW WILTING POINT. NEGATIVE DEFICIT INDICATES AMOUNT OF GRAVITATIONAL WATER PRESENT, i.e. AMOUNT THAT THE MOISTURE PRESENT EXCEEDS FIELD CAPACITY.

(a) DATA FROM WHEAT PLOTS HARVESTED 6/29/59.
RAINFALL SINCE MARCH 17, 1.79 INCHES.
(b) RAINFALL SINCE APRIL 29, 1.27 INCHES.
(c) RAINFALL SINCE JUNE 2, 13.78 INCHES.
(d) DATA ARE FROM WHEAT PLOTS HARVESTED 6/20/60.
RAINFALL SINCE HARVEST 6/20/60 - 15.44 INCHES.
(e) RAINFALL SINCE SEPTEMBER 20, 4.49 INCHES.
ONLY A TRACE OF RAINFALL RECORDED IN NOVEMBER.

DESCRIPTION OF SOIL MOISTURE SITES

Location	Soil: Type	Soil: Cover	Slope: Percent	Slope: Direction (facing)	Method of Measurement	Field Capacity (inches) for Depth Increments Reported: Top Layer	2nd Layer	3rd Layer	4th Layer	5th Layer	6th Layer	Remarks
SOUTHWESTERN GREAT PLAINS FIELD STATION, BUSHLAND, TEXAS. (See remarks No. 2 & 3).	Pullman Silty Clay Loam. (A deep, fine textured, slowly permeable soil). (See remarks No. 1).	Wheat stubble utilizing minimum stubble mulch tillage to control weed growth.	0-1	Southeast	Mechanical sampling gravimetric determinations of moisture utilizing a power driven "viehmeyer" type tube with a .75" tip. (See remark No. 4).	2.0	2.3	4.6	4.1	3.7	3.4	Cooperator: U. S. D. A. - ARS 1. Erosion: None to slight; wind removal predominates. 2. Data are from wheat plots in a controlled, long-term experiment initiated in 1957. 3. Reporting sequence will normally begin in July (following wheat harvest in June), and continue on same fallowed plots until new plots are available in July of following year. i.e., the plots reported on will be fallow from harvest of one year to harvest of the succeeding year. 4. Soil moisture: determined by standard oven drying. 107-110°C.
						Total			20.2			

See reference notes following Station Index.

RELOCATION AND CHANGES OF EQUIPMENT

ANAHUAC NAV OFFICE	Equipment moved 7 miles W	September 7, 1960
ARANSAS PASS 2	Rain gage moved 0.9 mile NE	October 24, 1959
ATHENS	Equipment moved 2 miles NNW	July 1, 1960
AUSTIN MONTOPOLIS BR	Rain gage moved 0.3 mile WNW	May 18, 1960
BARNHART	Rain gage moved 0.5 mile E	March 1, 1960
BOXELDER	Rain gage moved 1050 feet N	March 12, 1960
BUENAVISTA 2 NE	Recording rain gage moved 1.6 miles NE	November 10, 1959
CATARINA 3 NW	Recording rain gage installed	December 13, 1959
CATARINA	Equipment moved 3.5 miles SE	July 5, 1960
CHEROKEE	Recording rain gage moved 0.5 mile NNW	December 20, 1960
COMANCHE	Rain gage moved 600 feet NE	September 16, 1960
CORPUS CHRISTI WB AP	Equipment moved 3 miles W and installed on roof, 19 feet above ground	August 8, 1960
CORSICANA	Rain gage moved 75 feet SSE	November 5, 1960
DALLAS WB AIRPORT	Hygrothermometer installed	August 1, 1959
DANEVANG	Equipment moved 800 feet W	February 24, 1960
DAWSON 3 NE	Recording rain gage moved 1.5 miles SE	July 28, 1960
DUBLIN	Equipment moved 0.4 mile WSW	July 18, 1960
EASTLAND	Equipment moved .15 mile SW	November 1, 1960
EL PASO WB AIRPORT	Hygrothermometer installed	September 1, 1960
ELDORADO 3 SSW	Recording rain gage moved 90 feet E	November 2, 1960
EVANT	Recording rain gage moved 8 miles WSW	January 21, 1960
EVANT	Temperature equipment and standard 8" rain gage installed	September 20, 1960
FORT STOCKTON 2 NE	Recording rain gage removed	March 2, 1960
GOLDTHWAITE	Temperature equipment installed	November 3, 1960
GORDONVILLE	Recording rain gage moved 300 feet W	April 19, 1960
GRAHAM	Equipment moved 0.6 mile NNW	May 24, 1960
GRAHAM	Equipment moved 300 feet ENE	October 13, 1960
GRANBURY	Equipment moved 0.5 mile SE	February 4, 1959
HARLETON	Rain gage moved 500 feet W	March 10, 1960
HOUSTON WB AIRPORT	Hygrothermometer installed	July 29, 1960
JUNCTION	Recording rain gage moved 0.8 mile NW	February 26, 1960
KOUNTZE	Recording rain gage moved 0.2 mile W	March 16, 1960
LANGTRY	Recording rain gage moved 1000 feet SE	July 22, 1960
LATEX	Equipment moved 500 feet NNE	October 20, 1960
LIVINGSTON 2 NNE	Equipment moved 4.4 miles N	July 30, 1960
LOVELADY	Recording rain gage moved 700 feet N	January 12, 1960
LULING	Equipment moved 2 miles W	December 2, 1959
MARFA 9 W	Recording rain gage moved 9.7 miles W	March 5, 1960
MASON	Equipment moved 1.8 miles W	November 3, 1960
MCGREGOR	Temperature equipment installed	September 20, 1960
MIAMI	Equipment moved 0.4 mile ENE	February 16, 1959
MIAMI	Equipment moved 800 feet SW	January 25, 1960
MIDLAND WB AIRPORT	Equipment moved to roof	July 25, 1960
MORGAN MILL	Rain gage moved 1200 feet NW	November 1, 1960
MUENSTER	Rain gage moved 22 feet NE	April 19, 1960
NEUVILLE	Rain gage moved 800 feet SW	December 1, 1960
PALO PINTO	Rain gage moved 1200 feet E	January 1, 1960
PANDALE	Rain gage moved 70 feet WSW	October 25, 1959
PILOT POINT	Temperature equipment installed	October 26, 1960
PITTSBURG 5 S	Equipment moved 0.65 mile SW	March 10, 1960
PORT ARTHUR WB AIRPORT	Hygrothermometer installed	December 1, 1960
SAN ANGELO WB AIRPORT	Hygrothermometer installed	May 1, 1960
SANDERSON	Rain gage moved 1/2 block N	October 25, 1960
SEGUIN	Equipment moved 0.6 mile SSE	May 1, 1959
SINTON 3 ESE	Equipment moved 1.8 miles SE	June 1, 1960
SNYDER	Equipment moved 0.7 mile S	April 11, 1960
SPEARMAN	Equipment moved 0.5 mile SW	December 1, 1960
STRATFORD	Equipment moved 0.5 mile WNW	December 8, 1960
SUNRAY 4 SW	Recording rain gage moved 4.4 miles SW	February 1, 1960
TELEPHONE	Recording rain gage moved 300 feet E	March 8, 1960
THORNTON	Rain gage moved 1/4 mile SSE	August 10, 1960
THURBER 5 NE	Rain gage moved 350 feet S	April 13, 1960
VALLEY VIEW	Rain gage moved 0.3 mile WSW	December 4, 1959
WEATHERFORD	Standard 8" rain gage moved 80 feet SE	August 22, 1960
WELLINGTON	Temperature equipment installed	January 1, 1960
WICHITA FALLS WB AP	Equipment moved 2 miles SE	June 23, 1960
WICHITA FALLS WB AP	Hygrothermometer installed	December 1, 1960
WINK	Recording rain gage moved 300 feet NE	August 24, 1959
WINNSBORO	Rain gage moved 100 feet SW	September 12, 1960

At Hygrothermometer installations: this temperature equipment was installed at a site over sod on the landing area as near as possible to the center of the runway complex but sufficiently distant from buildings and paved areas to minimize or eliminate unfavorable effects.

TOTAL PRECIPITATION

ISOLINES ARE DRAWN THROUGH POINTS OF APPROXIMATELY EQUAL VALUES. HOURLY PRECIPITATION DATA FROM RECORDER SUBSTATIONS WILL BE AVAILABLE IN THE PUBLICATION "HOURLY PRECIPITATION DATA."

REFERENCE NOTES

Additional information regarding the climate of Texas may be obtained by writing to the State Climatologist at Weather Bureau Airport Station, 1710 Wilshire Blvd., Austin 2, Texas, or to any Weather Bureau Office near you.

Unless otherwise indicated, dimensional units used in this bulletin are: Temperature in °F., precipitation and evaporation in inches, and wind movement in miles.

Evaporation is measured in the standard Weather Bureau type pan of 4 foot diameter unless otherwise shown by footnote following Table 4.

Climatological divisions, outlined on the maps in this bulletin, became effective with data for October 1956.

Figures and letters following the station name, such as 12 SSW, indicate distance in miles and direction from the post office.

Delayed data and corrections will be carried in the June and December issues of Climatological Data.

- \- No record
- \+ Also later date (dates) or months.
- * Amount included in following measurement.
- V Includes total for previous month. V in annual column means total is for a two-year period.
- // Gage is equipped with a windshield.
- # Thermometers are generally exposed in a shelter located a few feet above sod covered ground; however the reference indicates that the thermometers are exposed in a shelter located on the roof of a building.
- B Adjusted to full month.
- C Data for recorder stations denoted by "C" in the Refer to Tables column of the Station Index are processed for special purposes and published in "Hourly Precipitation Data". Length of record for recorder-only stations may be found in the annual issue of "Hourly Precipitation Data".
- E Amount is wholly or partially estimated.
- M One or more days' record missing; if average value is entered, less than 10 days record is missing. See monthly Climatological Data for detailed daily record.
- R Amounts from recording gage. (These amounts are essentially accurate but may vary slightly from the amounts to be published later in Hourly Precipitation Data.)
- T Trace, an amount too small to measure.

Information concerning the history of changes in location, elevations, exposures, etc., of substations through 1955 may be found in the publication "Substation History" for this state. That publication may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C., for $1.00. Similar information for regular Weather Bureau stations may be found in the latest issue of Local Climatological Data annuals, obtained as indicated above, price 15 cents.

Subscription Price: 20 cents per copy, monthly and annual; $2.50 per year. (Yearly subscription includes the Annual Summary.) Checks and money orders should be made payable to the Superintendent of Documents. Remittances and correspondence regarding subscriptions should be sent to the Superintendent of Documents, Government Printing Office, Washington 25, D. C.
